

## Specification Sheet: Frameless Glass Whiteboard

The Frameless Glass Whiteboard is a contemporary and highly practical alternative to a traditional whiteboard. It is made with toughened 4mm safety glass featuring a non-porous surface that is highly durable and will not ghost or stain – regardless of how long ink is left on.

Polished and rounded edges add to the functionality and safety of the board, and the frameless design creates a visually appealing way to join multiple boards together to form a communication wall. The board is floated 20mm off the wall with stainless steel barrel fixings, and the screw-off caps conceal the fittings and make for easy installation.

### Product Type

Whiteboard

### Warranty

Lifetime Surface Warranty

### Dimensions
